🌐 **Irzirhmtllh.id**   in **Irzi Rahmatullah**   🐙 **zaxchax**

I am an active computer science student with approximately one year of experience in software engineering, particularly focused on web development. I have a strong foundation in modern web technologies, including React, Next.js, and MySQL. Currently, I am passionate about building user-centric applications that address real-world challenges, such as mental health solutions and financial management tools. My academic background and hands-on projects have equipped me with the skills to design, develop, and deploy efficient and scalable web applications.

EXPERIENCE

Freelance Web Depelopment   **Jun 2024 - Present**

- Developed web applications using React as the main technology stack.
- Implemented responsive and user-friendly interfaces with a focus on UX.
- Built and optimized web applications for performance and scalability.
- Collaborated with clients to define project requirements and deliver tailored solutions.

EDUCATION

BACHELOR OF COMPUTER SCIENCE   **2023 - Present**

University of Singaperbangsa Karawang

- Specialization in Advanced Manufacturing.
- Participating in various activities involving technology, committees, and taking courses related to programming

MATHEMATICS AND SCIENCE   **2020 - 2023**

SMA Negeri 1 Ciampea

- Actively participate in various activities at school, for example taking part in extracurricular activities, taking part in competitions, and being part of committees.

TECH STACK

- **JavaScript**
- **TypeScript**
- **Express/Node**
- **React JS**
- **Next JS**
- **MySQL**
- **Firebase**
- **Git Version Control**

OTHER SKILLS

- **Communication**: Able to clearly articulate technical concepts to both technical and non-technical stakeholders.
- **Problem Solving**: Skilled in identifying issues and developing creative solutions within tight deadlines.
- **Collaboration**: Experienced in working within teams, leveraging diverse skill sets to deliver high-quality projects.
- **Adaptability**: Quick to learn and implement new technologies and frameworks to meet project needs.
- **Attention to Detail**: Meticulous in writing clean, maintainable, and efficient code, with a focus on usability and performance.
- **Time Management**: Capable of balancing multiple projects simultaneously while ensuring timely delivery.
